

Recently approved ancillary projects FY 2023

This document lists all independent investigator-led project proposals approved by the Sample and Data Usage Committee (SDUC) in fiscal year 2023.

Please refer to the [Sample and Data Usage Committee webpage](#) for ancillary projects approved to date.

February 2023

Rosa Martin Mateos, Hospital Universitario Ramón y Cajal, Spain

Prognostic value of neutrophil-to-lymphocyte ratio as a marker of immune dysfunction in ACLF

June 2023

Florian van Bömmel, University of Leipzig, Germany

Association of 1,3-beta-D-glucan detection in different body fluids with GI leakage and outcome in patients with acute-on-chronic liver failure

Eric Trépo, CUB-Hôpital Erasme, Belgium

Evaluating the impact of cardiopulmonary complications in cirrhosis and ACLF: hepatopulmonary syndrome, portopulmonary hypertension and cirrhotic cardiomyopathy/diastolic dysfunction

Eric Trépo, CUB-Hôpital Erasme, Belgium

Decoding prognostic trajectories in decompensated cirrhosis without acute-on-chronic liver failure: a machine learning approach

Maria Pilar Ballester, Hospital Clínico Universitario de Valencia, Spain

Evaluation of factors defining the natural history and response to therapy of patients hospitalized with an acute episode of hepatic encephalopathy

October 2023

Rajeshwar Prosad Mookerjee, University College London, UK

Heart rate and blood pressure parameter dynamism, as digital markers to determine progression of cirrhosis acute decompensation
